

RedLine Solutions Now Offers Machine Vision Systems

June 07, 2010 RedLine Solutions announces the addition of Machine Vision Systems to its portfolio of industrial data collection and barcode printing offerings. RedLine is a strategic partner with Microscan, a leader in Machine Vision hardware and software products for applications including inspection, gauging, guidance, and identification.

“The addition of Machine Vision is a natural extension for RedLine as we have been a Microscan Partner for barcode systems over the past 13 years,” said Todd Baggett, CEO of RedLine Solutions, “Microscan’s acquisition of Siemens Machine Vision business unit in 2008 gives them unparalleled products and intellectual property in this space.”

“We are excited to have RedLine Solutions’ bring on our Machine Vision Product Line,” said John Macrina, Microscan’s Vice President of Worldwide Sales. “They have been a key partner in Microscan’s growth and success. RedLine Solutions investment in both sales and engineering talent for Machine Vision Systems shows their commitment to delivering complete solutions to their customers.”

RedLine Solutions’ Machine Vision offering includes Microscan’s smart cameras, VisionScape Image Capture Software, and NERLITE lighting. Matched with our experienced Vision Sales Staff and Vision Engineering Services, RedLine has the ability to deliver turnkey solutions, including applications for QA inspection, precision measurement, assembly part verification and placement, as well as barcode label and marking validation.
